STRADCOM@14. FORGING AHEAD --- ALL FOR PUBLIC SERVICE!

AS VISIONARY AND AS COMMITTED AS EVER, STRADCOM DEDICATES ITSELF TO THE LTO'S SUCCESSFUL COMPUTERIZATION

Today's LTO proves that Stradcom's winning bid has made a winner of us all

ALL THESE YEARS, STRADCOM'S WINNING BID FOR THE LTO-IT PROJECT STANDS UP TO EVERY SCRUTINY

ILANG BESES NANG DUMAAN SA BUTAS NG KARAYOM.

Evaluated thrice over by three Administrations.
Scrutinized by the NEDA. Dissected by the Philippine Congress.
Reassessed by five DOTC Secretaries.
Audited-on basis by the COA.

AND TOTALLY BATTLE TESTED: PROVING ITSELF TO THE FILIPINO PEOPLE, EVERYDAY

Stradcom met the singular honor of overhauling the LTO's brand of public service. As computerization of the government office institutionalized positive changes by way of shorter transaction time, with customers spending less time for the renewal and application of their drivers' licenses and vehicle registrations.

What's more, Stradcom successfully installed interconnectivity not only between the 200 offices of the LTO, but with other government and private entities as well. Interconnectivity helps ensure that emission testing, Comprehensive Third Party Liability insurance policies and other vital processes are integrated in the automated renewal and application processes, and duly complied with by the motoring public. Today, the whole country benefits from the LTO's automation by Stradcom.

THE FIRST PUBLIC-PRIVATE PARTNERSHIP THAT WORKED—AT ZERO COST TO THE GOVERNMENT; THE MOST SUCCESSFUL UNDER THE GOVERNMENT'S BUILD-OWN-OPERATE PROGRAM

A TIMELY CELEBRATION OF A SPECIAL VICTORY... COMMERCIAL COURT JUNKS SUMBILLA CLAIM AS A HARRASSMENT SUIT : CONFIRMS QUIAMBAO AS LEGITIMATE STRADCOM OWNER

The LTO leadership has stated that the ownership of STRADCOM must be decided by the courts so that LTO then can recognize the rightful owners. The rightful owner has now been confirmed by the commercial court of RTC Branch of Urdaneta, Pangasinan, duly assigned by the Supreme Court. Its ruling: CEZAR T. QUIAMBAO and not the group of Bonifacio Sumbilla, is the true and legal owner of Stradcom.

MORE REASONS TO CELEBRATE : THE SUCCESSES OF STRADCOM'S LTO-IT PROJECT

Stradcom's winning bid way back in 1998 was deemed to be the most complete, the most beneficial and the most technically viable, with the lowest cost per transaction for LTO customers: [illegible] versus the next lower bid of [illegible].

To date, the successes of the automation project Stradcom designed, engineered, implemented, maintains and continues to power the LTO is a source of corporate pride.

LTO'S NEW BRAND OF PUBLIC SERVICE: BETTER, FASTER, AS POWERED BY STRADCOM

Today, days of faster transactions and streamlined operations are in stark contrast to how LTO offices operated before its computerization.

Stradcom's computerization of the LTO proves that public service can be overhauled, to become more timely, more accessible, with less wastage of time for the transacting public, and with less human intervention that effectively helps minimize corrupt practices like fixing.

BETTER, FASTER DELIVERY OF LTO SERVICES NOW INSTITUTIONALIZED

All 200 LTO offices around the country are automated and interconnected. The computerization program resulted in an astronomical increase in the number of transactions daily — almost over 80,000 — which is twice the transaction number set by the LTO at the onset of the program.

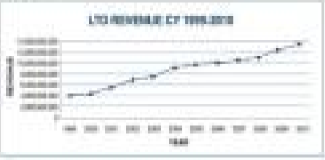
LTO EARNINGS SKYROCKET UPWARDS, TRANSLATES TO MORE GOVERNMENT RESOURCES FOR PROJECTS

More government revenues from the LTO's transactions with the public can now be utilized by the government for more projects that will benefit the Filipino.



INTERCONNECTIVITY THAT WORKS

A VITAL PART OF THE ORIGINAL BID MANDATED BY THE DOTC/LTO AND IMPLEMENTED BY STRADCOM

NOW BENEFITTING MOTORISTS AND THE ENTIRE COUNTRY... INCREASING THE GOVERNMENT'S EARNINGS

Under the Terms of Reference for the LTO-IT Project and the scope of work for the winning LTO-IT provider, Stradcom required that it created an information highway that allows real time interconnectivity among the central, regional, district and field offices of the LTO, and the extension of interconnection for other government agencies and the private sector as well.

The interconnectivity projects encompassed the Private Emission Testing Center (PETC), Comprehensive Third Party Liability (CTPL) Verification and NMISA Accreditation System—all mandated by the DOTC and LTO and all necessary parts of the LTO's total computerization.

EMISSION CENTER TESTING HELPS SAFEGUARD PUBLIC HEALTH

With the ease of interconnectivity, vehicle owners, who have their units submitted for emission testing are cleared once proven compliant with safety levels.

BEFORE INTERCONNECTIVITY, APPROXIMATELY [illegible] OF ALL REGISTERED VEHICLES DID NOT GO THROUGH EMISSION TESTING.

Today, compliance has improved considerably. Not just for the benefit of one motorist, but for the good of the environment, and the country.

THE END OF NON-EXISTENT AND BOGUS INSURANCE POLICIES

What problematic before in the LTO were quite a number of fake insurers issuing fake insurance policies to motorists. What's more, about [illegible] of all registered motor vehicles did not actually have the required Compulsory Third Party Liability (CTPL).

This is an area that interconnectivity has again helped overhaul: only legitimate insurers are in the automated system, and vehicle owners have become more compliant with the required CTPL, as it is part of the streamlined computerized processes they must undergo during registration.

MMDA APPREHENSIONS NOW SETTLED, FINES PAID: EARN THE GOVERNMENT NEEDED INCOME

Because of necessary links to the MMDA, drivers and motorists with apprehensions are automatically informed during license application and renewal, and during their vehicle registrations. Almost [illegible] of these apprehensions are now settled and addressed, helping deter future violations.

FRANCHISES FOR VEHICLES CONFIRMED

Before interconnectivity, only an estimated [illegible] of vehicles for hire had confirmed franchises. Today, inquiries on franchises and their releasing are part of the automated system of the LTO and the LTFRB, providing real time crucial information to franchise holders and applicants.

INTERCONNECTIVITY FEES NOT A BURDEN TO THE PUBLIC

Interconnection fees are NOT CHARGED TO THE PUBLIC, but as specified in the Terms of Reference of the LTO-IT Project, they are charged to the private business entities and government agencies concerned.

MORE SAVINGS FOR THE GOVERNMENT

It can be argued that through interconnectivity, Stradcom helps secure the following income for the government: [illegible] that came with new technology like the emission centers and income from legitimate insurers. They would otherwise have been lost due to unscrupulous practices.

Consider the following: almost [illegible] annually in terms of VAT collection from the emission testing centers; about [illegible] in terms of insurance policy premiums from [illegible] to [illegible]; at least [illegible] annually in terms of savings from franchise payments to the LTFRB; [illegible] in fees for the settlement of MMDA apprehensions for road and traffic violations.

IT'S BUSINESS AS USUAL FOR THE LTO WITH STRADCOM'S CONTINUOUS DELIVERY OF I.T. SERVICES

The LTO has not incurred any losses since it started [illegible] collection from the transacting public for services already rendered by Stradcom.

The operations of the LTO continue, with no interruptions. Cash payments by the transacting public continue to come in daily, at a huge volume, considering the LTO's [illegible] offices. In fact, it is safe to estimate that the total daily earnings of the LTO may reach millions. An otherwise impossible goal to reach if computerization had stopped. BUT made possible by Stradcom's continuous, uninterrupted service.

All for public service. So as not to waste the gains achieved by our computerization of the LTO.

A TRUE PARTNER

STRADCOM POURED IN AN INVESTMENT OF [illegible] MILLION TO AUTOMATE THE LTO. STRADCOM SPENDS ALMOST [illegible] MILLION MONTHLY TO POWER THE LTO'S I.T. SERVICES.

[illegible]

Stradcom incurred losses during the early years, but it kept its eyes on the goal: the successful computerization of the LTO.

It is only on the eighth year of operation that we realized a return on our investment. BUT THE RETURNS DID NOT IN ANY WAY REACH THE [illegible] RATE THAT WERE FORECASTED IN [illegible]—OUR RATE OF RETURN IS ESTIMATED TO ONLY HIT [illegible] BY [illegible], AND THIS IS PROFIT WE'D HAVE EARNED HONORABLY.

FEATHERS IN STRADCOM'S CAP

[illegible]

Stradcom will go down in history as the visionary, pioneering I.T. company that successfully implemented the LTO's full automation.

Recognitions came from both the public and private sectors, here in the country and internationally.
